

Summary of a Request for Proposal (RFP) – Data Analytic Interface System (DAIS)

Purpose of RFP: This RFP will result in a Contract to combine our existing multiple data repositories into a unified data repository with a one Data Analytic Interface.

Term: Three (3) years from the date of award with, optional, one-year renewals. Target date to award contract is July 2007. Deployment of DAIS is July 2008.

Justification: The Authority is responsible for compiling and disclosing standardized health care data (consistent with state and federal privacy protections) to assist consumers, payers, providers and policy makers in making better and more transparent policy decisions.

Scope of Work:

- To combine KHPA data assets into a single repository that can be accessed through a tailored interface (i.e., software) that:
 - Is user friendly
 - Produces verifiably correct reports
 - Performs its functions in a daily business management time frame
 - Improves the productivity of staff who will use it to carry out KHPA's statutory responsibilities for data analysis, extraction and policy development.
- KHPA Data Assets to be combined:
 - Medicaid/SCHIP and all other publicly funded programs
 - Five years history
 - Kansas State Employee Health
 - Three years history
 - Kansas Insurance Information System (KHIIS)
 - No history
 - Medicaid/SCHIP Managed Care Encounter Data
 - Five years history
- Features of the Interface (software):
 - Administrative Level
 - Vendor created reports
 - User has capability to make changes
 - Ability to drill down to summary level
 - Analyst Level
 - Vendor created reports
 - Ad hoc capabilities
 - Able to drill down to individual claim level
 - Security
 - Different levels for different users based on need
 - Groupings
 - Disease Episodes (e.g., diabetes, asthma, etc.)
